PROJECTS

GYMTRACK

A full stack application to help gym instructors create classes, and to allow gym members to book classes and leave reviews.

ROLE	Configured and set up application database using both SQL and Sequelize. Created routes to render backend data to frontend HTML pages using Handlebars. Contributed to overall and responsive visual design.
TECH	Model-View-Controller pattern, Node.js, Express, JavaScript, jQuery, Handlebars, SQL, Sequelize, Passport.js, bcrypt, HTML, CSS, Bootstrap, Heroku
APP	gymtrack-app.herokuapp.com/
GITHUB	github.com/jkaho/gymtrack

EAT-DA-BURGER!

A full stack burger logging application that allows users to input, store and delete burger names.

ROLE	Sole author
TECH	Model-View-Controller pattern, Node.js, Express, JavaScript, SQL, Handlebars, HTML, CSS, Heroku
APP	jkaho-burger.herokuapp.com/
GITHUB	github.com/jkaho/burger

RESTAURANT OTAKU

A restaurant search application that allows users to save favourite restaurants and to add personal notes and/or images.

ROLE	Used jQuery AJAX method to make requests to APIs. Created GUI using JavaScript, jQuery, HTML and CSS. Implemented responsive design with CSS and Foundation.
TECH	JavaScript, jQuery, Third-Party API, HTML, CSS, Foundation
APP	jkaho.github.io/restaurant-otaku/
GITHUB	github.com/jkaho/restaurant-otaku

EXPERIENCE

2015 – 2019 | Retail Supervisor

Harris Farm Markets

Assisted customers, oversaw junior workers, handled cash process, and communicated with corporate workers as well as suppliers at a popular local grocery store.

- ✓ Promoted from junior cashier to supervisor within three months.
- ✓ Known as a reliable team player who communicated effectively with co-workers and customers.
- ✓ Awarded a supervisor bonus for diligence and consistency in completing tasks efficiently.
- ✓ Worked with junior cashiers to successfully improve cashier scan rates and to decrease error rates.
